İMT1000	BASIC DESIGN II				
Semester	Code	Name	T+P	Credit	ECTS
2	İMT1000	BASIC DESIGN II	2	2	3

Education Type	Language	Course Level	Course Internship Status	Type of Course
Formal Education	Turkish	Associate	No	Required

Department/Program	Precondition	Course Coordinator	Instructor	Course Assistants
Interior Design		Instructor Ömer Faruk GÜRBÜZ	Instructor Serhat GÜLEBENZER	None

The aim of lesson :

Bu dersin amacı, öğrencilerin mimari tasarım sürecinde temel kavramları, tasarım öğeleri ve ilkelerini kavramalarını sağlamaktır. Öğrenciler; biçim, oran, denge, ritim, ışık, doku gibi kavramları analiz ederek, iki ve üç boyutlu tasarımlar oluşturma becerisi kazanırlar. Ayrıca görsel algı ve estetik ilişkiler üzerine farkındalık geliştirir, bu bilgileri özgün mekân kurgularında kullanabilecek düzeye ulaşırlar.

Course Contents :

The course covers an overview of architectural styles, architectural design elements (point, line, plane, form, size, proportion, texture, movement, light, shadow), and design principles (repetition, harmony, contrast, unity, balance). By examining visual perception, composition, and aesthetic relationships, the course aims to develop students' spatial thinking, analysis, and interpretation skills.

İMT1036	ERGONOMICS AND WORK STUDY				
Semester	Code	Name	T+P	Credit	ECTS
2	İMT1036	ERGONOMICS AND WORK STUDY	2	2	2

Education Type	Language	Course Level	Course Internship Status	Type of Course
Formal Education	Turkish	Associate	No	Elective

Department/Program	Precondition	Course Coordinator	Instructor	Course Assistants
Interior Design		Instructor Ömer Faruk GÜRBÜZ	Instructor Serhat GÜLEBENZER	None

The aim of lesson :

This course aims to teach fundamental concepts in work study and ergonomics, and to provide a perspective on how people and work should be evaluated within this context. It explains the use of essential problem-solving tools and teaches methods and tools for method study, job design, job analysis, and workplace, equipment, and vehicle design. It introduces ergonomic approaches to improving human health, safety, comfort, and performance in the workplace.

Course Contents :

Introduction to Work Systems Design, Method study, Time study, Introduction to Ergonomics, Physical Ergonomics (Physiology), Physical Ergonomics (Anthropometry), Manual Material Handling, Physical Work Environment, Human-Machine Systems, Cognitive Ergonomics, Occupational Health and Safety, Ergonomics software applications.

Formal Education	Turkish	Associate	No	Required

Department/Program	Precondition	Course Coordinator	Instructor	Course Assistants
Interior Design		Instructor Ömer Faruk GÜRBÜZ	Instructor Okan ÇITAK	None

The aim of lesson :

The aim of this course is to help students develop an awareness of occupational health and safety by recognizing the risks they may encounter in their working lives. Students will analyze the causes of occupational accidents and illnesses and learn the necessary precautions and legal regulations to prevent them. The course aims to equip individuals with the knowledge, skills, and attitudes to protect their health and occupational safety, and to emphasize that creating a safe work environment is an integral part of professional responsibilities.

Course Contents :

The course primarily covers the concept, history, and fundamental principles of occupational safety. It focuses on the causes of occupational accidents and illnesses, risk factors, accident analysis, and reporting processes. Students will learn about physical and chemical risk factors, safe working methods in workshops, and safety practices for machinery and hand tools. Furthermore, topics such as fire and explosion risks, fire extinguishing techniques, and the use of protective equipment are supported with practical examples. By the end of the course, students will be able to integrate occupational health and safety principles into professional practice, both theoretically and practically.

İMT1042	ACOUSTIC AND FIRE SAFETY				
Semester	Code	Name	T+P	Credit	ECTS
2	İMT1042	ACOUSTIC AND FIRE SAFETY	2	2	2
Education Type	Language	Course Level	Course Internship Status	Type of Course	
Formal Education	Turkish	Associate	No	Elective	
Department/Program		Precondition	Course Coordinator	Instructor	Course Assistants
Interior Design			Instructor Ömer Faruk GÜRBÜZ	Instructor Serhat GÜLEBENZER	None
The aim of lesson :					
The aim of the course is to provide students with an understanding of the fundamental principles and material properties that affect the acoustic comfort and fire safety of buildings. Students learn about sound behavior, noise control, and sound insulation, while also evaluating passive and active fire safety measures, material flammability classes, and the fire resistance of building elements. By the end of the course, they will develop a holistic perspective on safe and comfortable building design.					
Course Contents :					
It covers the fundamental principles of ensuring acoustic comfort and fire safety in building design. The first weeks examine the nature of sound, sound behavior in spaces, echo, reverberation time, and acoustic control methods. Subsequent weeks cover noise sources, sound insulation materials, airborne and impact sound insulation in building elements, and the control of indirect sound transmission. The second part of the semester focuses on fire safety, covering passive and active fire precautions, material flammability classes, ignition processes, fire classifications, and the fire resistance of building elements. This provides students with the knowledge and skills to assess a building's acoustics and fire safety, and to select appropriate materials and details.

İMT2043	COST ACCOUNTS				
Semester	Code	Name	T+P	Credit	ECTS
3	İMT2043	COST ACCOUNTS	2	2	2

Education Type	Language	Course Level	Course Internship Status	Type of Course
Formal Education	Turkish	Associate	No	Elective

Department/Program	Precondition	Course Coordinator	Instructor	Course Assistants
Interior Design		Instructor Ömer Faruk GÜRBÜZ	Instructor Hakan ŞİMŞEK	None

The aim of lesson :

The aim is to teach cost planning and control approaches in design problems in interior architecture and cost control approaches in the application phase; to calculate work programs, quantity take-offs, surveying works, unit price analyses and related applications with computer support; to understand the basic information about contract content, technical specifications, preparation of cost calculations, provisional and final acceptance procedures, factors affecting building costs and calculation methods.

Course Contents :

The course will cover the role and importance of cost planning and control in interior architecture; the concepts of cost, price, and value; types of costs: initial investment cost, usage cost, indirect cost, direct cost, fixed cost, variable cost, etc.; factors affecting cost; time and resource management; time and resource estimation, planning, and control; work planning, work progress control; risk management; risk planning and control; and technical specifications and contracts.

İMT2031	QUALITY ASSURANCE AND STANDARDS				
Semester	Code	Name	T+P	Credit	ECTS
3	İMT2031	QUALITY ASSURANCE AND STANDARDS	2	2	2

Education Type	Language	Course Level	Course Internship Status	Type of Course
Formal Education	Turkish	Associate	No	Required

Department/Program	Precondition	Course Coordinator	Instructor	Course Assistants
Interior Design		Instructor Ömer Faruk GÜRBÜZ	Instructor Okan ÇITAK	None

The aim of lesson :

The aim is to ensure that students understand the concept of quality, the importance of standardization, and the fundamental principles of quality management systems. Students learn the role of quality assurance in the manufacturing and service sectors, the structure of national and international standards, quality control processes, and continuous improvement approaches. The goal is to cultivate individuals who are quality-conscious in their professional practices and who embrace a production and service approach that complies with standards.

Course Contents :

Beginning with the fundamentals of the concept of quality, the course covers quality management systems, standardization, metrology, and calibration. The application of quality assurance in manufacturing and service sectors, along with an examination of standards in various areas such as environmental, occupational health and safety, and food safety, constitutes a significant portion of the course. Additionally, total quality management, the EFQM excellence model, process management, strategic management, inspection and sampling techniques, and quality control tools such as control charts are also covered. Throughout the course, students gain theoretical knowledge and practical skills in establishing, implementing, and continuously improving quality systems.

KRY101	Career Planning				
Semester	Code	Name	T+P	Credit	ECTS
1	KRY101	Career Planning	1	1	2

Education Type	Language	Course Level	Course Internship Status	Type of Course
Formal Education	Turkish	Associate	No	Required

Department/Program	Precondition	Course Coordinator	Instructor	Course Assistants
Interior Design		Instructor Ömer Faruk GÜRBÜZ	Instructor Ömer Faruk GÜRBÜZ	None

The aim of lesson :

The Career Planning course aims to raise students' awareness of the importance of career planning in preparing for the professional world by introducing them to the business world, different sectors, and their requirements. The course helps students explore their personal competencies and gain a clear understanding of business expectations, helping them develop their knowledge and skills to align with the requirements of their respective sectors.

Course Contents :

They learn about career, what are the concepts of career development, the importance of career development, what is the concept of career management, the objectives of career management, what is the concept of career planning, the stages of career planning, the concept of career plateau, career path, career anchor, and what is career shock.

İMT2045	WOOD PRODUCTION MACHINES				
Semester	Code	Name	T+P	Credit	ECTS
3	İMT2045	WOOD PRODUCTION MACHINES	2	2	2

Education Type	Language	Course Level	Course Internship Status	Type of Course
Formal Education	Turkish	Associate	No	Elective

Department/Program	Precondition	Course Coordinator	Instructor	Course Assistants
Interior Design		Instructor Ömer Faruk GÜRBÜZ	Instructor Hakan ŞİMŞEK	None

The aim of lesson :

The principles of using production machines in processing wood and wood-based materials are taught.

Course Contents :

Introduction and usage of sawing, cutting, drilling, sanding, turning and CNC machines

İMT1018	COMPUTER-AIDED DESIGN II				
Semester	Code	Name	T+P	Credit	ECTS
2	İMT1018	COMPUTER-AIDED DESIGN II	4	3	5

Education Type	Language	Course Level	Course Internship Status	Type of Course
Formal Education	Turkish	Associate	No	Required

Department/Program	Precondition	Course Coordinator	Instructor	Course Assistants
Interior Design		Instructor Ömer Faruk GÜRBÜZ	Instructor Serhat GÜLEBENZER	None

The aim of lesson :

The aim of this course is to develop students' advanced digital modeling and visualization skills focused on interior design. Students will learn how to create concepts for various types of spaces, design furniture and fittings, create realistic materials and textures, apply lighting settings, and apply rendering techniques to create professional-level presentation layouts. The course aims to enable students to manage design processes holistically, integrate technical knowledge with aesthetic understanding, and effectively utilize digital tools during the production process.

Course Contents :

As part of the course, students will digitally develop space and furniture designs for various spaces, including entryways, living rooms, kitchens, bathrooms, bedrooms, children's rooms, storage, and outdoor spaces. This process involves hands-on practice in the stages of concept development, modeling, rendering, and presentation layout preparation. Students will also learn professional visualization techniques through digital material rendering, realistic texture creation, lighting settings, and post-rendering adjustments. This will equip them to complete the interior design process with the principles of technical accuracy, visual quality, and aesthetic integrity.

İMT2023	COMPUTER-AIDED DESIGN III				
Semester	Code	Name	T+P	Credit	ECTS
3	İMT2023	COMPUTER-AIDED DESIGN III	4	3	5

Education Type	Language	Course Level	Course Internship Status	Type of Course
Formal Education	Turkish	Associate	No	Required

Department/Program	Precondition	Course Coordinator	Instructor	Course Assistants
Interior Design		Instructor Ömer Faruk GÜRBÜZ	Instructor Serhat GÜLEBENZER	None

The aim of lesson :

The goal of this course is to develop students' three-dimensional digital modeling skills so they can professionally translate their architectural designs into a three-dimensional environment. Throughout the course, students will learn to create complex geometries, design realistic scenes, and present these scenes using advanced modeling, editing, material, lighting, and rendering tools within Autodesk 3Ds Max. The goal is to equip students with the skills to produce both technically and aesthetically compelling digital models.

Course Contents :

This course begins with the user interface and basic settings of 3Ds Max, then covers modeling principles, object creation and transformation techniques, modifier commands, and pre-built parametric objects. Students will learn practical methods for converting two-dimensional drawings to three-dimensional forms (Extrude, Loft, Lathe, Sweep, etc.). In the following weeks, complex forms are achieved using Boolean and ProBoolean operations. Realistic scene creation techniques are then explored, focusing on lighting, cameras, materials, and rendering engines (Mental Ray, V-Ray). The course's overall content is delivered with a practice-based teaching approach that integrates digital production skills with realistic presentation techniques during the design process.

İMT2025	FURNITURE DESIGN AND MATERIALS TECHNOLOGY				
Semester	Code	Name	T+P	Credit	ECTS
3	İMT2025	FURNITURE DESIGN AND MATERIALS TECHNOLOGY	3	3	4

Education Type	Language	Course Level	Course Internship Status	Type of Course
Formal Education	Turkish	Associate	No	Required

Department/Program	Precondition	Course Coordinator	Instructor	Course Assistants
Interior Design		Instructor Ömer Faruk GÜRBÜZ	Instructor Hakan ŞİMŞEK	None

The aim of lesson :

The aim of this course is to provide students with a theoretical and practical understanding of basic and advanced construction techniques, joining methods, and fasteners used in furniture production. The course examines different types of joining using solid and panel materials, aiming to develop structural solutions that are suitable for aesthetics, durability, and functionality. Students will become familiar with modern joining systems used in assembling furniture components and gain the competence to create construction details suitable for industrial production processes.

Course Contents :

The course covers the fundamental principles of furniture construction, the classification of joining techniques, and the selection of appropriate fastening systems based on material properties. Various methods, from width and length joints to solid table and frame corner joints, from gear and slat joints to cabinet body assembly systems, are discussed both theoretically and practically. Additionally, the structural properties of demountable systems, as well as connecting devices such as Minifix and Rafix used in modern furniture systems, are discussed. Students are encouraged to examine the construction details of door and drawer systems and develop functionally and aesthetically appropriate solutions.

İMT2027	PACKAGE PROGRAMS				
Semester	Code	Name	T+P	Credit	ECTS
3	İMT2027	PACKAGE PROGRAMS	4	3	5

Education Type	Language	Course Level	Course Internship Status	Type of Course
Formal Education	Turkish	Associate	No	Required

Department/Program	Precondition	Course Coordinator	Instructor	Course Assistants
Interior Design		Specialist Dr. Ömer Faruk GÜRBÜZ	Specialist Dr. Ömer Faruk GÜRBÜZ	None

The aim of lesson :

The aim of this course is to enable students to effectively use current software packages in the field of interior design, and to acquire skills in two and three-dimensional digital drawing, modeling, visualization, presentation, and basic editing. By increasing students' ability to plan, develop, and present the design process in a digital environment, the course aims to improve the computer-aided design skills needed in professional practice.

Course Contents :

Introduction to software packages used in interior design, user interface, basic commands, file management, two-dimensional drawing, three-dimensional modeling, material and texture applications, lighting, camera settings, rendering techniques, basic image editing operations, preparation of presentation sheets, data transfer between different software, and project applications.

İMT2029	FINE DESIGN IN DECORATION				
Semester	Code	Name	T+P	Credit	ECTS
3	İMT2029	FINE DESIGN IN DECORATION	2	2	3

Education Type	Language	Course Level	Course Internship Status	Type of Course
Formal Education	Turkish	Associate	No	Required

Department/Program	Precondition	Course Coordinator	Instructor	Course Assistants
Interior Design		Instructor Ömer Faruk GÜRBÜZ	Instructor Hakan ŞİMŞEK	None

The aim of lesson :

It is aimed to teach information about door, window, wall, floor and ceiling covering, insulation and lighting of the space in the space.

Course Contents :

Door, door types, materials used in the door, elements that make up the door, Window, Window types, the materials used in the window, the elements that make up the window. Wall cladding and its types. Flooring and its types. Ceiling coating and its types, suspended ceilings. Partitions and separators, decorative separators. Radiators and concealment of radiators. Indoor insulation. Light and lighting in the interior

İMT2057	ARCHITECTURAL RESTORATION TECHNIQUES				
Semester	Code	Name	T+P	Credit	ECTS
3	İMT2057	ARCHITECTURAL RESTORATION TECHNIQUES	2	2	2

Education Type	Language	Course Level	Course Internship Status	Type of Course
Formal Education	Turkish	Associate	No	Elective

Department/Program	Precondition	Course Coordinator	Instructor	Course Assistants
Interior Design		Instructor Ömer Faruk GÜRBÜZ	Instructor Hakan ŞİMŞEK	None

The aim of lesson :

The aim of this course is to analyze the structural, material, and technical properties of traditional buildings, providing a scientific and practical perspective on the processes of their conservation, restoration, and reuse. Students are expected to develop sustainable restoration methods that preserve the authentic values of historical buildings, identify building materials, and select appropriate intervention techniques. This course will provide students with both theoretical and practical knowledge and skills that will contribute to the preservation of cultural heritage.

Course Contents :

The course covers the architectural and structural systems of traditional buildings, wood and masonry construction techniques, structural element properties, material deterioration, and preservation methods. Building typologies are examined through selected historical examples from various regions of Turkey, and the effects of environmental factors (earthquakes, floods, humidity, etc.) on buildings are evaluated. The course covers repair techniques for wood and masonry structures, preventing deterioration from water and humidity, examining traditional connection details, and providing practical instruction in the preliminary restoration processes.
