İNŞ-1005	RESISTANCE				
Semester	Code	Name	T+P	Credit	ECTS
1	İNŞ-1005	RESISTANCE	3	3	4
Education Type	Language	Course Level	Course Internship Status	Type of Course	
Formal Education	Turkish	Associate	No	Required	
Department/Program	Precondition		Course Coordinator	Instructor	Course Assistants
Construction Technology			None	Instructor Okay YILDIZ okay.yildiz@gop.edu.tr	None

The aim of lesson :

To provide students with the ability to analyze the behavior of structural members under external loads, to understand stress-strain relationships, and to perform basic strength calculations.

Course Contents :

Concepts of force, equilibrium and moment; stress and strain; Hooke's law; axial loading; torsion; shear force and bending moment diagrams; bending stresses; deflection of beams; combined loading cases.

İNŞ-1004	CONCRETE TECHNOLOGY				
Semester	Code	Name	T+P	Credit	ECTS
2	İNŞ-1004	CONCRETE TECHNOLOGY	3	3	3
Education Type	Language	Course Level	Course Internship Status	Type of Course	
Formal Education	Turkish	Associate	No	Required	
Department/Program	Precondition		Course Coordinator	Instructor	Course Assistants
Construction Technology			None	Instructor Okay YILDIZ okay.yildiz@gop.edu.tr	None

The aim of lesson :

To teach the components, production process, tests, additives and modern types of concrete, and to provide knowledge on quality control and implementation principles.

Course Contents :

Aggregate, cement, water and admixtures; properties of fresh and hardened concrete; mix design, production, transportation, placement and curing; ready-mixed, high-strength, fiber-reinforced and self-compacting concretes.

İNS-1007	MATHEMATICS				
Semester	Code	Name	T+P	Credit	ECTS
1	İNS-1007	MATHEMATICS	3	3	3
Education Type	Language	Course Level	Course Internship Status	Type of Course	
Formal Education	Turkish	Associate	No	Required	
Department/Program	Precondition		Course Coordinator	Instructor	Course Assistants
Construction Technology			None	Instructor İBRAHİM KARAN	None

The aim of lesson :

The objective of this course is to enable students to grasp fundamental mathematical concepts and operations and apply them to problems in engineering and technical fields. The aim is to develop analytical thinking skills in number systems, equations, ratios and proportions, inequalities, and functions.

Course Contents :

This course covers fundamental concepts, positive and negative, prime and consecutive numbers, factorials, rational and decimal numbers, exponents and radicals, first and second-degree equations, ratios and proportions, identities, inequalities, absolute value, functions, quadratic and cubic equations, and polynomial equations, with a theoretical and problem-solving approach.

İNS-1063	TECHNICAL DRAWING				
Semester	Code	Name	T+P	Credit	ECTS
1	İNS-1063	TECHNICAL DRAWING	4	3	4
Education Type	Language	Course Level	Course Internship Status	Type of Course	
Formal Education	Turkish	Associate	No	Required	
Department/Program	Precondition		Course Coordinator	Instructor	Course Assistants
Construction Technology			None	Instructor Okay YILDIZ okay.yildiz@gop.edu.tr	None

The aim of lesson :

To teach students the rules of technical drawing and to enable them to create engineering drawings using drawing instruments in accordance with technical standards; to introduce the fundamentals of 2D and 3D drawing.

Course Contents :

Standards in technical drawing, line types, scales, lettering, and dimensioning; geometric constructions, projection, views, sections, perspective drawings; reinforced concrete element drawings; introduction to computer-aided drawing applications.

Tokat Vocational School Construction Technology

İNŞ-1003	OCCUPATIONAL HEALTH AND SAFETY				
Semester	Code	Name	T+P	Credit	ECTS
1	İNŞ-1003	OCCUPATIONAL HEALTH AND SAFETY	2	2	2

Education Type	Language	Course Level	Course Internship Status	Type of Course
Formal Education	Turkish	Associate	No	Required

Department/Program	Precondition	Course Coordinator	Instructor	Course Assistants
Construction Technology		Instructor Ömer Faruk GÜRBÜZ	Instructor Okan ÇITAK	None

The aim of lesson :

The aim of this course is to help students develop an awareness of occupational health and safety by recognizing the risks they may encounter in their working lives. Students will analyze the causes of occupational accidents and illnesses and learn the necessary precautions and legal regulations to prevent them. The course aims to equip individuals with the knowledge, skills, and attitudes to protect their health and occupational safety, and to emphasize that creating a safe work environment is an integral part of professional responsibilities.

Course Contents :

The course primarily covers the concept, history, and fundamental principles of occupational safety. It focuses on the causes of occupational accidents and illnesses, risk factors, accident analysis, and reporting processes. Students will learn about physical and chemical risk factors, safe working methods in workshops, and safety practices for machinery and hand tools. Furthermore, topics such as fire and explosion risks, fire extinguishing techniques, and the use of protective equipment are supported with practical examples. By the end of the course, students will be able to integrate occupational health and safety principles into professional practice, both theoretically and practically.
