Mission

To conduct our educational and teaching activities with environmental responsibility, raising awareness among our students and academic staff about the zero-waste philosophy, thereby contributing to a sustainable future.

Vision

To be an exemplary higher education institution that embraces the concept of a sustainable university, instils environmental awareness in its students, and makes the zero-waste approach a pioneering value in its educational programmes and scientific research.

Objectives

- Promoting zero waste awareness in educational units.
- Instilling environmentally friendly habits in students.
- Encouraging waste reduction, recycling and reuse in academic activities.
- Integrating sustainability and zero waste content into teaching programmes.
- Continuously monitoring and reporting on zero waste practices at the Vocational School.

Policy

- Incorporating the zero-waste philosophy into course content and activities,
- Developing awareness-raising projects with student participation,
- Ensuring that materials used in educational activities are recyclable and environmentally friendly,
- Establishing infrastructure for waste separation at source,
- Transparently sharing zero-waste practices on the websites of educational units.
